

The MES Standard Van

The streamlined design of the **Standard Van** from MES allows ease and accessibility throughout. The interior is divided into three areas: a driver area, operator control room with a tool cabinet and outside door, and an equipment room outfitted with space saving storage compartments for system accessories.

All TV control components are modular in design and are mounted for quick and easy operator inspection, adjustment and servicing. Each Standard Van is customized to fit that customer's particular needs.
