3rd Eye MobileVision™ Digital Video Recorders

**Make a Record.**

**Introducing 3rd Eye MobileVision™ Digital Video Recorders.**

## **STATE OF THE ART DVR. EXCLUSIVELY FROM AWTI.**

Alliance Wireless Technologies, Inc. now offers the most advanced Mobile Digital Video Recorders on the market. These state of the art 3rd Eye MobileVision™ recorders are engineered to be as tough as they are easy to use. They work like a standard VCR, except they playback crisp video and audio from a hard drive or compact flash card that plugs directly into your computer via a USB connection.

### **3rd Eye MobileVision™**

The 3rd Eye MobileVision™ Security System applies digital video recording (DVR) technology to provide accurate real-time surveillance.

Think of MobileVision™ as a “Black Box” for the commercial transportation and distribution industries. Among the standard features available on every MobileVision™ DVR:

- Wireless Capability
- Vandal-Proof Casing
- Shock-Resistant Housing
- Works with 1 to 8 Cameras
- Multiple Easy Playback Options
- Panic Switch to mark drive and label as “PANIC” for easy review
- 8 Inputs & Auto Switches for direction

### **HC460/HC860**

#### **Event Playback**

Playback of a certain event is easy. The HC460/HC860 features eight sensor inputs for marking events. A search can be conducted by time, date, or emergency. When in playback mode, the user has the option to choose “fast forward” (at rates of x2, x4, or x8), “rewind,” “pause,” and “stop.”

#### **High Resolution Video & Clear Audio**

The HC460/HC860 has crisp video at 720 x 584 resolution for DVD quality playback. Industry-best sound quality is recorded on 4 individual audio channels on the HC460 and 8 channels on the HC860.

## Archiving

Several options are available to save the video. It can be saved on the 2.5" SATA hard drive, or transferred to DVD, VHS, and other forms of archiving. The hard drive can also be directly connected to the computer through a USB reader connection.

## Massive Storage Capacity

The latest MPEG4 and JPEG Compression (Switchable) technology provides motion picture quality with best compression H2.64. The HC460 comes standard with 160GB capacity and 320GB optional. On the HC860, 320GB capacity is standard.

## Security

A vandal-proof case, with shock resistant housing protects the unit. There are no user-selectable buttons on the face of the DVR. All data is securable through password.

## Service

The HC460 and HC860 were designed to be completely field serviceable, which virtually eliminates downtime. In addition, technology upgrades can be performed in under a minute, without ever changing the equipment.

## IntelliTrax® VSM™

High resolution video and audio with IntelliTrax Virtual Synchronized Mapping (VSM) is integrated into many of the 3rd Eye MobileVision systems. The VSM feature displays a map of exact position, name of street, speed and time with full synchronization to the video cameras.

The VSM collects all detailed map information of a vehicle's travels and displays this information on-screen including speed, direction, and location, which comes standard on the IntelliTrax VSM. Other information recorded includes door activity, reverse, brake, stop arm, right turn, left turn, and amber lights. These are all included on the new VSM.

There is no subscription fee for VSM GPS.

All cameras are synchronized with the unit's visual map thus removing the question about where and when an event occurred. The VSM also allows the driver to set a destination and navigate to that destination.

## Features

- Free Passive GPS Tracking and Speed (no service fee)
- Built-In IntelliTrax® VSM™ (Virtual Synchronized Mapping)
- RF Antenna
- USB Active Sync Connection
- SD Card VSM Mapping
- DVR Connection
- GPS Antenna
- Touch Screen Capable
- RGB Monitor Capable
- External Speaker (Option)
- Vandal Proof Casing
- Shock Resistant Housing
- Built-in Passive GPS (standard) with signal control to display the vehicle's activity (no subscription/service fee)
- 1 year warranty
