

2007 Camel on International 7400 Chassis

This machine was delivered in April of 2008. The original buyer had to let the trucks go back and we are putting new hose and filters on the bodies. You will need to add whatever nozzles and tubes you want. We will make sure the machine puts out 2,000 PSI and offers a minimum of 18" of suction.

The price is \$212,000, fob Atlanta. There will be no FET as they are used. You will need to pay sales tax wherever you buy a license plate for the trucks. These are a real bargain for any contractor or municipality that wants a combination machine in great shape and at far below new pricing.

Take a look at the complete specs shown to the right. For more information, additional photos or to secure this machine, give us a call or send an email.

Original Specifications

Delivered New in April 2008

	Description
	Dump body type Camel 200/10.8 cu. yd. (8.2 m ³) combination unit/ 10-Bolt Drive
